

DMIT1530

Assessment One

HTML/CSS Web Page “Photobook”

Due: Friday January 27th, 2017

Weight: 15%

Introduction

The student will recreate the website “Photobook” based on the PSD design comp provided. The completed site must demonstrate well-formed and structured HTML markup while writing clear and efficient CSS. Please review the marking guide for more information.

Submission

Upload the assignment to the sweb2.dmit.nait.ca webserver under your student folder. Create a folder (if you have not already done so) named **1530** and upload your assessment one project folder there. Please ensure that your project folder is named **assessment-01-firstname** (where *firstname* is your actual first name). The URL to the completed assignment will be:

<http://sweb2.dmit.nait.ca/username/1530/assessment-01-firstname/>

Please submit the URL to your assessment as well as a zip of your project folder to Moodle before the due date.

To reiterate, your assessment must be present on both the swab2 server and on Moodle in order to receive a grade.

LATE ASSIGNMENTS WILL NOT BE ACCEPTED!

Marking Guide: Summative Assessment One		
Tasks (one mark for each task completed satisfactorily)	Value	Total
This page uses the basic HTML5 page layout framework developed in class (six marks) <ul style="list-style-type: none"> JavaScript solution linked with a conditional comment for older versions of IE. CSS solution for old browsers to understand new html5 elements CSS reset employed containing CSS clear fix solution used. Code is well indented and spaced with comments to promote ease of understanding and reading. File and folder structure follows class framework and is named intuitively to class standards. The page uses a semantic page title. 		
HTML5 Markup (four marks) <ul style="list-style-type: none"> Markup is well structured and the document headings (h1 – h6) follows the content semantically. Elements are used correctly to markup content as outlined by the HTML5 specification. The page shows clear separation between markup and style. The page validates at the following URL: validator.w3.org with no inadmissible errors. 		
CSS Styles (eight marks) (Note: please simply use Arial, sans-serif for the font family if you are unfamiliar with Google web fonts) <ul style="list-style-type: none"> Selectors are chosen to reduce or reuse CSS statements. Specificity is used to select individual or multiple targets. Font sizing methodology has been implemented em, rem, or px. Typographic scales in use for heading and copy content. Semantic naming used for all class or id selectors. CSS documents are well formatted, structured and ordered. Unused CSS statements are removed to improve performance. CSS validates at the following URL: jigsaw.w3.org/css-validator/ with no errors 		
Layout & Format of the Page. (three marks) <ul style="list-style-type: none"> Developed HTML page resembles the original design concept as laid out in the design comp. Page elements are spaced and aligned correctly using padding and margins. Spelling and grammar reflects a professional project. 		
This assessment is worth 15% of your final mark	Grand Total
